OFFICIAL STATEMENT

-Regarding Changes in Ownership Structure

26th October 2026,

Arsenal Football Club can confirm the club has converted into a state-backed club and is now owned by the Dubai Royal Family after the economic shortfall of Kroenke Sports and Entertainment. The deal has been completed and confirmed and now the privately owned era of Arsenal Football Club ends. Such a major sudden change will cause many questions by not only our fans but people around the world.

Arsenal is a top-tier English Premier League Club competing at the highest level of football. However, running a club at the top-tier level of football requires a lot of financial funds which is not available to every club owner, making them get heavy debt and bank loans to allow the club to stay afloat.

To conclude under our new ownership structure our club's debt has been cleared and funds will be invested in fixing up the stadium's infrastructure and keeping our club's economic stability. We will also use the money provided to the club to develop the youth academy and training facilities. We will continue to remain transparent on how the club is run and will follow the UEFA's financial regulations.
